**High Efficiency Motors**  
Specially designed high efficiency low noise motors fitted with thermal protection enclosed in a metal housing allows to give an effective & safe performance.

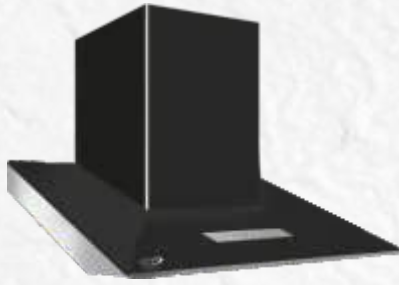

**Switch**  
The hood are provided with push control switches which are very easy to use.

**Lamp**  
The cooker hoods are equipped with LED lights, contributing to saving energy and add more elegance to look & feel

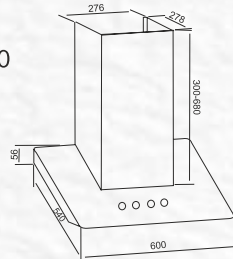

**Bi-rotational Technology**  
Oxygen slim hoods come with two high performance motors rotating in opposite direction to create a special low pressure zone, this low pressure cavity forces the fumes to rush in, resulting in a much higher airflow compared to conventional system.

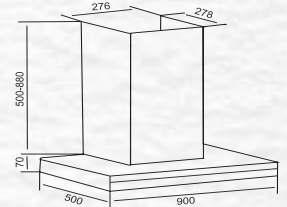

### Oxy 2068-60 PB BF

- Finish - Grey (sand Finish)
- No of Lamps - 3 x LED
- Size (Cms) - 90

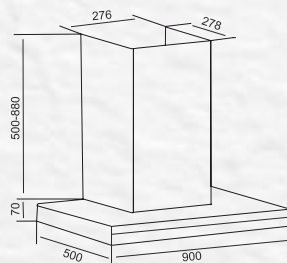

## Lets Time it.

Touch screen chimneys come with a unique automatic switch-off system (timer function). With these you need not switch off the chimney immediately after cooking. You can allow the smell and the fumes to fully get out of the kitchen while you finish off your other work. There is no need to wait to switch-off as there is convenience to pre-set the timer.

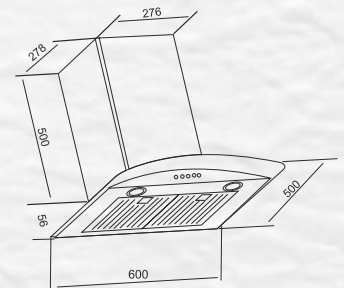

### Model - Oxy 2079-90 DLX TC - Black

- Air Flow (M3/hr) - 1000
- Speed - 3
- Control - Touch Control
- Filter - Baffle Filter
- Housing - FRP
- Finish - SS
- No of Lamps - 3 x LED
- Size (Cms) - 90

### Oxy 2061-60 SL TC BF (BLK)

- Air Flow (M3/hr) - 1000
- Speed - 3
- Control - Touch Control
- Filter - Baffle Filter
- Housing - FRP
- Finish - Mat Blk + Glass

- Size (Cms) - 60

#### Feel the Touch

This state of art touch control system allows you to have smooth slide between different levels of speeds for extraction. Touch control makes cleaning easy and helps you to have a pleasurable experience by getting the real feel of your hood

#### Carbon Filters (Optional)

When the chimney is installed in re-circulation mode the carbon filters absorb cooking smell and odour and the clean air is re-circulated into the kitchen

# A Class Apart!

A touch of automation for an advanced you. There is no need to pull or push, just one touch is enough to bring this Italian designed piece of art into action. The elegant and neat look matches its superior performance. The automatic hydraulic shutters open upon a touch to bring the chimney into operation and close to make it look neat when the fumes are out.

# Built in Hobs Indian Style

An Italian Touch

- **Modern, Yet Truly Indian**
- **Indian Brass Burners**
- **Suitable For Indian Cooking**

## First brand in India to successfully launch Built-in Hobs with actual Indian Burners

A big revolution was brought in Indian Built-in – Hob industry with this introduction which has helped our Indian consumers to get the right kind of flame needed for our chappatis and sabzis. The dual and triple flame brass burners with centre heating are internationally designed especially for India. They allow uniform spread of flame needed in our rotis and also in sabzis cooked in round bottom vessels. These hobs are fast cooking friendly and perfectly suit the Indian style cooking. Oxygen is proud to bring you these unique Brass Burners built-in hobs in various configurations.

### Triple & Mini Triple Flame Burners ( Brass )

These burners come with three lines of flame to allow perfect & even spread of flame required for chapattis, dosas, phulkas and deep frying etc. These burners come in two sizes to allow the right flame as per needs.

### Metal Knobs

Bold and Elegant Metal knobs give stunning look to your built in hobs. They allow you a firm grip and are strong enough to last long. They are made so durable that you need not look after them later.

### Multi Spark Auto Ignition

### Gas Valves

High quality gas valves assure you total safety and perfect control of flame. These smooth operating valves allow you one touch auto ignition (integrated auto) for more convenience. Chances of gas leakages and sim-off is also greatly reduced by use of these valves.

### Cast Iron Pan Supports

Strong and durable pan supports allow you to keep large and heavy utensils. The rough surface of cast iron also allows firm grip for the utensils.

### Dual Burner (3D Full Brass)

These specially designed burners are made for Indian cooking needs. They boost high efficiency and also allow fast cooking required by us.

# Hobtops !

**Built- in Hob? Standalone gas stove (cooktop)?  
- put it the way you like it !**

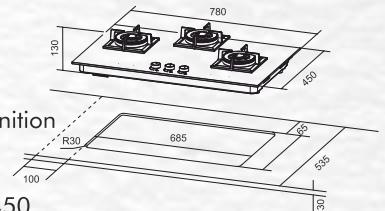

## 2 in 1 design

One design that serves two purposes. They can be used both as a built-in hob as well as cooktop (gastove). Today's gas stove can be a futuristic hob and vice versa. Knobs are conveniently placed on the top for your convenience and to make it look elegant and ultra slim. Also they come with actual Indian burners to provide you the right flame. Just like a hob the bottom is packed to save it from unnecessary dirt entering it, with an option to open the chamber to clean it as per needs

## **Jyoti Gas geyser Advantage - Why Choose Jyoti Geyser ?**

### **Introduction of Low Pressure Geysers**

It was the first company in India to bring Gas Geysers that can work even at low water input pressure. When gas geyser were first introduced in market, geysers were able to work only at place where water pressure was high. So, those living in a bungalow / row houses or living on the top floor of an apartment or people using storage tanks were not able to use gas geysers. Thus, a fruitful solution to this was brought about by Jyoti by Introduction of low pressure (LP) gas geysers. Thus bringing a big resolution in gas geyser industry.

### **Modern Looking Geysers**

Jyoti was the first company in India to bring Glass top gas geyser, also it was first to bring Digital printed glass in gas geysers. Thus changing how gas geysers overall looked, making it stylish and neat.

## The Jyoti Advantage! -Why Choose JYOTI Gas stoves ?

### First to introduce toughened Glass Cooktops (Gas stoves) in India

Jyoti introduced toughened glass gas stoves in the year 2002, first in gas stove industry, way ahead of others.

At the beginning of the 21st Century when all of India was using the same old stainless steel gas stove, something big and revolutionary happened in the Indian gas stove Industry. It was none other than toughened Glass top gas stoves entering the Indian market, first brought by JYOTI.

- **First to Introduce 3D Brass Burners for better fuel efficiency, faster cooking & Ultra - Modern look**
- **First & only company to have Fully Automatic (integrated) gas stove in India.**  
Now buy Semi-Automatic? When you have an option of Fully automatic, One push auto ignition!
- **First company to introduce Removable Drip Trays in glass top stoves**  
Now cleaning is more easy!
- **First Company to Introduce World's Slimmest Gas stove!**
- **First Company to Introduce Matte (Frosted) glass in gas stove Industry.**

So it looks like a Granite, but it is glass!

3D Brass Burner

Metal knobs

Bold and Elegant Metal knobs give stunning looks to your cooktops. They allow you a firm grip and are strong enough to last long. They are made so durable that you need not look after them later.

Imported gas valves

High quality imported gas valves assure u total safety and perfect control of flame. These smooth operating valves allow you one touch auto ignition (integrated auto) for more convenience. Chances of gas leakages and sim-off is also greatly reduced by use of these valves.

Matte Finish Glass

Extra Heavy Pan Support

Freedom of Space

Get the widest space between two burners to enable users to place their large utensils comfortably without them clashing one another.

Collared mixing tubes

Specially designed collared mixing tubes (burner base) allow extra durability. Chances of passage of flame between the burner and burner base (i.e flame coming out between the burners) is highly reduced adding extra life to your burner.

**BUILT WITH UNIQUE 3D FLAME TECHNOLOGY**

**UPTO 13% GAS SAVING**  
**UPTO 30% FASTER COOKING**

# First & only company to have Fully Automatic (integrated) gas stoves in India.

**Why buy semi-Automatic? When you have an option of Fully automatic ! Say 'NO' to semi-automatic!**

Jyoti was the first company to bring integrated battery operated auto ignition system (built-in auto ignition in the gas button itself) in glass cooktops. This kind of auto ignition was earlier seen in built-in hobs only, but this visionary move by jyoti made it possible to use the same system of high-end auto ignition in your simple budgeted gas stoves/cook tops. In this kind of integrated (one touch) auto system there is no need of a side button for sparking, the sparking happens when you turn ON th gas button itself. Making it a one touch auto ignition (in other semi automatic (older) type of auto ignition you need to turn ON the gas button and then press a sparate button for auto ignition sparking, hence making it a two step process). This unique one touch multi spark auto Ignition also helps to save our precious gas, as it ignites instantaneously. This extraordinary innovation by jyoti Save Indian housewives precious time and also makes cooking pleasure.

# Oil EXTRACTOR

### Benefits of Oil Machine at Home -

- 1) Home made Oil is rich in nutrition
- 2) It is free from harmful chemicals
- 3) It Boosts immune system
- 4) 100% Fresh and Natural

## MAKE Pure Oil YOURSELF

### Why choose JYOTI Oil Extractor machine pressed oil other than regular refined oil?

- It is important that the oil we are using in our diet is nutritious but the refined oil which one buys after watching advertisement on tv, which promises you to lose weight with labels like "Losorb" & "refined bleached lite" which means that they have been highly processed through extreme heat and are gone through refining with chemical processing and they hardly have any nutrients in them and are not beneficial for health in the long run.

**JYOTI Oil Extractor's** 'machine pressed oils' are extracted through moderate speed and pressure which when used with organic seeds & nuts extract oil exactly how our ancestors extracted it in the olden days. These oils are more nutritious to our body than the highly refined oils, plus they enhance the test of our food.

## YOU CANNOT IGNORE IT'S HEALTH BENEFITS

# अनाज चाहे कोईभी हो पीसने का एकही नाम ज्योती आटा चक्की

**i-Sensor Technolog:** No On-Off Switch, No Functions Button! - Fully automatic. This state off art i-Sensor technology senses and feels the hardness of the grain and sets RPM (rotation per minute) accordingly. So Whatever grain you put, the speed for it is set automatically without pushing any button. The unique Feeder device allows grain to flow slowly and as per grinding chambers need. This allows systematic and timely flow of grains to avoid unnecessary saturation (overflow) of grains in the grinding chamber.

**Silicon stamping Motor :** A normal motor will consume 1 HP = 1 Unit electricity. With this energy saving motors the cost is cut by one fourth, 1 HP = 0.75 units. Save money, save energy, save environment!

**Stainless Steel Grinding chamber, Blades and Bowl stand :** Higher models come with Purity of Stainless Steel in the grinding chamber area. Strong and robust SS chamber disallows flour from sticking to the chamber and blades thus making cleaning an easy thing. It also facilitates better and fine grinding. SS bowl stand makes the atta maker extra durable to sustain heavy weight and vibrations.
